• Click + to add the printer • Select the printer you connected to your NETGEAR router USB port.. Still no luck I went on to find another forum that dealt with this issue and followed some obscure instructions.. You can change this default setting and save files to your computer hard drive or network drive by following the instructions below.. When I first got this Macbook Pro, the setup found the printer which is connected to my network via a ethernet cable to the wireless router and it worked flawlessly.. Note: The printer must be connected to your NETGEAR router USB port To setup your network printer with Bonjour on a Mac computer: • Connect the printer to your NETGEAR router USB port.
